

GD-10P MANOMETER

FOR DIFFERENTIAL AIR PRESSURE MEASUREMENTS

- **MEASURING RANGE -500...+500 Pa**
- **GRAPHIC LCD DISPLAY**
- **0-POINT ACCURACY 0,2 Pa**
- **NO NEED TO RESET**
- **NO DEPENDENCY OF THE POSITION**
- **Li-Ion BATTERY POWERED**

GD-10P is economical battery powered instrument which because of the excellent measuring features is an outstanding meter for applications where precision low pressure difference measurement is needed.

Product Applications:

- Air velocity monitoring, when used with Pitot tube
- Monitoring or troubleshooting HVAC system

SPECIFICATIONS

<u>Display</u>	Graphic LCD display for pressure difference and for square root of pressure difference with one decimal
<u>Accuracy</u>	0-point accuracy 0,2 Pa
<u>Measuring range</u>	-50...+500 Pa
<u>Tube connection</u>	pressure port for 4 mm tube
<u>Housing</u>	Gray plastic 65x130x25 mm
<u>Power</u>	Li-Ion rechargeable battery

**EXCELLENT MEASURING
ACCURACY
OFFSET FREE
HYSTERESIS FREE**
